Froilan Roa 5739, La Florida, Chile | +56 9 9569 4692 | [robertto.e@gmail.com](mailto:robertto.e@gmail.com)

---

Intermediate knowledge in Backend with **NodeJs**.

Intermediate knowledge of Front-End in HTML, **CSS**, **SASS**, **Javascript**, **React**.

Basic management with the Javascript Testing Framework, **Jest**.

Relational and non-relational database administration using **MongoDB**, **MySQL**.

Intermediate knowledge of devops technologies such as **Docker** y **GIT**.

Positive attitude, excellent work ethic, committed, passionate about technology.

---

**FULL-STACK DEVELOPER** | Acámica | Datawarehouse Project | Santiago, Chile | 2021

I built a web application for the management of customer contact data of a marketing company, which has functionalities such as user authentication, a contact search engine, maintenance of contact data, company, user profiles, import / export contacts from/to an excel document, among others. On the front-end side, use HTML, CSS, SASS, and JS technologies, and as for the backend, develop a REST-FULL API in Nodejs with MariaDb as a database and libraries such as Express, JWT, and Sequalize.

**BACKEND NODEJS DEVELOPER** | Acámica | Delilah Restó Project | Santiago, Chile | 2021

This project was based on the creation of an online ordering system for a restaurant, where I worked on deploying a REST API that would allow registrations, cancellations, modifications and obtaining information about a data structure that a client could consume. I developed the API in Nodejs using the Express framework and MariaDb as a database, for API security use JWT.

**FRONT-END DEVELOPER** | Acámica | GIFOS Project | Santiago, Chile | 2021

Build an interactive web application to search for GIFs by fetching data via the Giphy.COM API, create your own GIFs by leveraging native browser tools like webcam fetching, and share them within the Giphy community . For the development of this project i used JS, CSS, SASS, HTML and Responsive Design technologies.

**FRONT-END DEVELOPER** | Acámica | Podcast Channel Project | Santiago, Chile | 2021

I designed a landing page for a Podcast channel with HTML, SASS, CSS and Responsive Design, developing functionalities for content reproduction, navigation, compatibility with multiple browsers and devices.

**RPG DEVELOPER** | Scotiabank | Tata Consultancy Services | Santiago, Chile | 2017-Actualidad

Development of services with RPG and SQL, resolution of incidents, optimization of processes, integral and unitary tests, continuous support to users, integration of SOAP services (XML) from the Banking Core to the IBM Datapower middleware. Participation in more than 10 projects actively in a multidisciplinary team applying agile methodology for a more effective development and production cycle.
